COMPANY OVERVIEW

ASI Electrics has been leading the way in large-scale, complex project delivery thanks to our depth of experience and our committed ‘make it happen’ attitude.

Blue chip clients in health and education, retail, commercial and residential sectors rely on us to provide specialist teams to meet their needs. At ASI we provide a range of services including electrical design, turn key electrical installations, electrical refrigeration, engineering and value enhanced solutions to provide an all-encompassing outcome for our clients.

We assemble the right teams and develop collaborative relationships to ensure that every project we participate in is delivered safely, on time, on budget and to the very highest standards.

Our reputation is built on our ability to ‘make it happen’, and our record of success attests to our commitment to exceeding our clients’ expectations and the repeat work that results from this.

SHARED SUCCESS

At ASI Electrics we strive for Shared Success. This is achieved by developing high performing teams that are aligned to our vision and values.

Shared success is dependent upon strong professional relationships and having genuine conversations.

We know that if we succeed, then all our valued clients and partners also succeed. This integrated approach begins with our people and the belief that together we can develop trusting relationships with all stakeholders to achieve long term mutual goals.

COMMUNITY

ASI Electrics is a responsible business, and that means we are responsible for all our actions – socially, ethically and environmentally.

As well as providing local employment, we support a range of ongoing initiatives that help create healthy, vibrant and cohesive communities.

We believe the best way that ASI Electrics can make a broad and meaningful contribution to the communities in which we operate is through engagement. We do this in a number of ways, such as: charity events, corporate friendships, charity partnerships, volunteering and donating.

We see ourselves as part of the communities in which we operate, and as such we strive to be positive, active and contributing participants in community life.

ENVIRONMENT

At ASI Electrics we all take the time to understand the importance of managing the environments in which we operate.

ASI Electrics has notable experience in operating within stringent quarantine regulations, and in managing environmental guidelines such as nature reserves.

We are highly sensitive to the overriding need to consider and protect our natural environments, so that we can preserve the land for future generations to enjoy.

RETAIL

MASTERS

PROJECT DETAILS

Builder:	Hacer Group
Value:	\$4.5 Million
Completed:	2014

The Masters facility had strict design requirements, which is why the installation required a complete mechanical and electrical specification. This included wiring, liaising, and connecting fusion equipment. Despite having difficult site access and uncooperative weather, the project was successfully executed.

“The delivery of the project was second to none. ASI met all milestones with ease. They were very easy to deal with any issues were sorted out with quiet phone call ”

James Patton, Project Manager, Hacer Group

POLARIS SHOPPING CENTRE

PROJECT DETAILS

Builder:	Hacer Group
Value:	\$3.2 Million
Completed:	2013

What's now known as a hub of activity, this project involved working with different specialty shops, apartments, premium retail shops, and hospitality trades. With multiple expectations from numerous clients, it was important to establish clear communication and adhere to the best practices.

The Polaris Town Centre consists of a wonderful mix of relaxed open spaces and vibrant urban comforts. Due to the precise and master planned installation, this project set a benchmark for sustainable communities.

BUNNINGS

PROJECT DETAILS

Builder:	ADCO
Value:	\$7.7 Million
Completed:	2013 & 2014

As more Bunning Warehouse stores open up across Australia, it is crucial to follow the same standards and protocols for consistency. The design and construction teams are instrumental to the development of Bunnings' multi-level store model.
